

MEERUT INSTITUTE OF ENGINEERING AND TECHNOLOGY, MEERUT

CORE VALUES

- **Contributing to National Progress and Development-** Ensuring our academic and research work promotes growth and development of our society and nation.
- **Fostering Global Competency among students-** Inclusion of meaningful knowledge, technical and life skills leading to competitive participation in the global community.
- **Infuse leadership and social responsibility-** Develop and promote leadership and sense of social responsibility among students by encouraging them to participate through outreach activities in healthcare and education, and creating awareness to contribute for underprivileged people and work for the solution of various social issues.
- **Promote collaborative and experiential learning-** Committed to collaborative study by sharing knowledge and experience.
- **Developing values and ethics-** Develop human values and professional ethics among students so that they imbibe respect, tolerance, trustworthiness, strong character, transparency, accountability, integrity of thought and responsibility towards themselves, society and environment for sustainable development.
- **Inculcating innovation and creativity to be technologically strong-** Develop new skills, implement latest technical know-how for management, innovative practices, programs and partnerships to enhance educational experience.
- **Quest for Excellence-** Ensures quality in staff, facilities, programs, services, and create-and-see higher benchmarks by promoting continuous improvement, encourage decision-making at the level of implementation in academic and involvement in non-academic areas.
