

ACTIVITY: GUEST LECTURE

Topic: Guest lecture on programming standards in Industry

Speaker: - Saiyam Jain (Alumni MIET, MCA)

Year: 2020

Organizing Department: MCA

Number of Participants: 66

Date: 28/02/2020

Description:

This lecture has been delivered by Mr. Sanyam Jain, who is the alumni of MCA at MIET and right now working as a developer in industry. He told about the standards of programming for good development, its purposes, its uses and many more in list. Because Good software development organizations want their programmers to maintain to some well-defined and standard style of coding called coding standards.

They usually make their own coding standards and guidelines depending on what suits their organization best and based on the types of software they develop. It is very important for the programmers to maintain the coding standards otherwise the code will be rejected during code review.
